VALID

Applies to

Edit box, edit line, edit table.

Description

Returns the input validation specification for the named control, or null if none is specified. Used with Get_Property only.

Usage

inputvalidation = Get_Property(objectname, "VALID")

Returns

Value returned by Get_Property:

Value	Description
inputvalidation	Any input validation specification is returned in inputvalidation. If nothing has been specified for input validation on this control, then inputvalidation return null. For an edit table, an @SVM-delimited array of column validations is returned.
