

VALID

Applies to

Edit box, edit line, edit table.

Description

Returns the input validation specification for the named control, or null if none is specified. Used with Get_Property only.

Usage

```
inputvalidation = Get_Property(objectname, "VALID")
```

Returns

Value returned by Get_Property:

Value	Description
<i>inputvalidation</i>	Any input validation specification is returned in inputvalidation. If nothing has been specified for input validation on this control, then inputvalidation return null. For an edit table, an @SVM-delimited array of column validations is returned.
