

# UNICODE\_ANSI Function

## Description

Converts a UNICODE string to an ANSI string.

## Syntax

*ansiString* = **UNICODE\_ANSI** (*uniCodeString*, *delimiter*)

## Parameters

The function has the following parameters:

Parameter	Description
<i>uniCodeString</i>	The Unicode string to convert to ANSI. This string will contain two-byte Unicode characters.
<i>delimiter</i>	The minimum delimiter value to use in the conversion.

## Returns

A string containing single-byte ANSI characters.

## See also
