

COLCHARS

Description

Set or retrieve the maximum number of characters for a column in an edit table control.

Applies to

Edit table.

Syntax

```
characters = Send_Message(controlID, "COLCHARS", columnno, newvalue)
```

Parameters

Parameters are as follows.

Parameters	Description
Columnno	Column position, beginning from 1. Use 0 to specify all columns.
Newvalue	If columnno > 0, COLCHARS indicates character limit for the column. If columnno is 0, passes an @FM-delimited array of column character limits to replace existing values. Pass null, to leave value intact.

Return value

Maximum number of characters for the specified column(s) (if multiple columns, in an @FM-delimited array).
