

# INSERT

## Description

Inserts new row or rows (for edit box and edit line, replaces selection).

## Applies to

Combo box, edit box, edit line, edit table, and list box.

## Syntax

```
insertedposition = Send_Message(controlID, "INSERT", rowindex, inserttext)
```

## Parameters

Parameters are as follows.

Parameter	Description
Rowindex	Position of row in the edit table display. This is not an OpenInsight row key. Use 1 to specify the first row, and use -1 to specify the last row. Not used for edit box and edit line controls.
Inserttext	Text to be inserted. @VM-delimited by columns (for edit table). @FM-delimited by row (for edit table and list box).

## Return value

The position of the inserted row.
