

# INSERT EX

## Description

Insert new item or items into a visible or non-visible part of a (hierarchical) list.

## Applies to

List box.

## Syntax

```
insertedposition = Send_Message(controlID, "INSERT_EX", indexex, inserttext)
```

## Parameters

Parameters are as follows.

Parameters	Description
Indexex	Position of item in the visible or non-visible part of a list box. Use 1 to specify the first row, and use -1 to specify the last row.
Inserttext	Text to be inserted. @FM-delimited by row.

## Return value

The position of the inserted row(s).
