

ROWHEIGHT

Description

Set or retrieve the height of all rows in an edit table control.

Applies to

Edit table.

Syntax

```
rowHeight = Send_Message(controlID, "ROWHEIGHT", RowNumber, NoOfPixels)
```

Parameters

Parameters are as follows.

Parameters	Description
RowNumber	Pass a zero (0).
NoOfPixels	The height of the rows in pixels.

Returns

Returns the rowheight of the table's row prior sending of the message.

Example

```
controlID = @window:'.TABLE_1'  
heightInPixels = 16  
rh = Send_Message(control,'ROWHEIGHT',0,heightInPixels)
```
