UPDATE

Description

Updates the image of an item in a list box with bitmaps.

Applies to

List box, combo box (with bitmaps).

Syntax

```
imageStructOld = Send_Message(controlID, "UPDATE", position [, imageStructNew ])
```

Parameters

For UPDATE, the Send_Message function has the following parameters.

Parameters	Description
ControlID	Same information as contained in the ctrlentID variable, from an event handler. The structure is Parent.Object, where Parent is the window identifier, and Object is the name of the control, and where Parent and Object are delimited by a period.
Position	Item position in a list, beginning with 1.
ImageStructOld /ImageStructNew	A comma-delimited array of image definitions. Image definition has a structure of: <image Number>['_'<image Column>] If <imageColumn> is omitted, it is equal to 1.

Example

```
/* the picture for the first item in a list box will have a second image of a bitmap in image column 1. */
Send_Message (listBox, "UPDATE", 1, "2 - 1")
```
