

CHOOSEDIR Service

Calls the common Windows File dialog box, modifying the dialog to display and return only directory information.

Parameter	Description						
<object>	Owner window						
<value>	@FM-delimited array: <table><tr><th>Value</th><th>Description</th></tr><tr><td><1></td><td>Title for the dialog</td></tr><tr><td><2></td><td>Initial directory</td></tr></table>	Value	Description	<1>	Title for the dialog	<2>	Initial directory
Value	Description						
<1>	Title for the dialog						
<2>	Initial directory						
Returnvalue	The directory path selected by the user or null if the operation was canceled.
