

# CREATE Service

## Description

Creates user interface object(s), as well as controls. Used by Create\_Dialog(), Dialog\_Box(), and Start\_MDChild().

**Note:** *This is a Windows only function.*

## Parameters

Parameter	Description
<object>	@FM:@VM:@SVM - delimited list of object-records. Refer to PS_EQUATES insert record for layout.
returnvalue	True if objects were created successfully. False if the operation failed.
