

# INT

Returns the integer component of a value.

## Syntax

```
Result = SRP_Math("INT", Value, "", DecimalPlaces, ScientificNotation)
```

## Returns

The integer component of *Value*.

## Remarks

The INT operation extracts the integer component from *Value*. It is equivalent to the INT() method in OpenInsight.

## Example

```
// Extract the integer component of 364.87451
Result = SRP_Math("INT", "364.87451")
!! Result = 364.0 !!
```

```
// Extract the integer component of PI
Val = "3.1415926535897932384626433832795"
Result = SRP_Math("INT", Val)
!! Result = 3.0 !!
```
