

NONE

Returns the value without performing any calculations.

Syntax

```
Result = SRP_Math("NONE", Value, "", DecimalPlaces, ScientificNotation)
```

Returns

Value.

Remarks

The NONE operation returns *Value* without performing any calculations. This operation is useful if you wish to format a number without changing it. For example, you could use it to convert a number into scientific notation.

Example

```
// Format the 3/6/08 national debt into scientific notation
Val = "9382669724008.03"
Result = SRP_Math("NONE", Val, "", -1, 1)
!! Result = 9.38266972400803E+12 !!
```

```
// Now, convert it back to fixed point format
Result = SRP_Math("NONE", Result)
!! Result = 9382669724008.03 !!
```
