

SUBTRACT

Subtracts two values.

Syntax

```
Result = SRP_Math("SUBTRACT", Value1, Value2, DecimalPlaces, ScientificNotation)
```

Returns

The difference of *Value1* subtracted by *Value2*.

Remarks

The SUBTRACT operation subtracts *Value1* by *Value2* and returns the result. You can use SUB for short.

Example

```
// Subtract PI by E
Val1 = "3.1415926535897932384626433832795"
Val2 = "2.7182818284590452353602874713527"
Result = SRP_Math("SUBTRACT", Val1, Val2)
!! Result = 0.4233108251307480031023559119268 !!
```

```
// Perform the same subtraction, but round to 6 decimal places
Result = SRP_Math("SUB", Val1, Val2, 6)
!! Result = 0.423311 !!
```
