

Entity History Log Dialog Box

The Entity History Log dialog box displays when the user chooses History... from the Entity menu. The dialog box displays as shown below:

Each type and class of entity has a discrete list of events that are entered into the entity history log. These include:

CHECKIN	Date and time entity was checked in
CHECKOUT	Date and time entity was checked out
COMPILE	Date and time of (re)compilation; compilation can occur implicitly, because of impact analysis; all instances of recompilation are recorded, automatically
NEW	Date and time of entity creation
UPDATE	Date and time of the most recent entity update
WRITE	Date and time of modification of source code
