

# SRP\_List\_Count

Gets the number of elements in the list.

## Syntax

```
Count = SRP_List_Count(Handle)
```

## Returns

The number of elements in the list

## Parameters

Parameter	Description
Handle	Handle to an existing SRP List <b>(REQUIRED)</b>

## Remarks

The `SRP_List_Count` method gets the size of the list. The count includes blank elements. In other words, this method tells you the number of elements that will results when you call [SRP\\_List\\_GetVariable](#).

**IMPORTANT:** You should always release the handle to an SRP List when you no longer need it by calling [SRP\\_List\\_Release](#).

## Examples

```
// Create an empty list
Handle = SRP_List_Create()

// Set 1 element at index 7
Index = SRP_List_SetAt(Handle, 7, "SRP")

// If we get the count, it will be 7, even though the first 6 are blank
Count = SRP_List_Count(Handle)

// Play nice with memory
SRP_List_Release(Handle)
```
