Get Printer function CANCEL

Description

This message returns the status of the print session.

Parameters

Message	Fields	Description
CANCEL	<1>	Returns a "1" if the user cancels the print job or closes the preview window during a print session.

Example

```
/* The following example shows how to use the CANCEL message. */

declare function Set_Printer, Get_Printer
stat = Set_Printer("INIT") ;* Start printing

loop
   readnext key else done = 1
until done
   cancelled = Get_Printer("CANCEL")
   if cancelled then
      done = 1
   end else
      Set_Printer("TEXT",'More text to print': key)
   end
repeat

stat = Set_Printer("TERM") ;* End printing
```
