

Set Printer INDENT

Description

The INDENT message is used to set the indents for the current printer. The Left, Right, First and Tab Indents set the size of the indents. The Space Before and After set the amount of extra space before and after each paragraph.

Parameters

Parameter	Description of Fields	Comments	Default
Parm1 - INDENT	<1> Left Indent <2> Right Indent <3> First Indent <4> Tab Indent <5> Space Before <6> Space After	<p>The diagram illustrates the layout of text on a page. At the top is a 'Top Margin'. Below it is a 'First Indent' followed by 'Space Before' and 'Space After'. The main text area is bounded by 'Left Indent' on the left and 'Right Indent' on the right. At the bottom is a 'Bottom Margin'. Arrows indicate the boundaries of these sections relative to the page edges.</p>	""

Example

```
/* The following example shows how to use the INDENT message to create a 1 inch left indent. */
declare function Set_Printer
stat = Set_Printer("INIT") ;* Start printing
stat = Set_Printer("INDENT", 1) ;* set 1 in left indent
stat = Set_Printer("TEXT", "Indented text.")
stat = Set_Printer("INDENT", 0) ;* clear the left indent
stat = Set_Printer("TEXT", "Not indented text.")
stat = Set_Printer("TERM") ;* End printing
```
