

Set Printer RECT

Description

The **RECT** message is used to print a rectangle at a specific location on the page using the current line style and fill style. The line and fill styles are set with the [LINESTYLE](#) and [FILLSTYLE](#) messages.

Parameters

Parameter	Description of Fields	Comments	Default
Parm1 - Location	<1> X1	Starting X position	0
	<2> Y1	Starting Y position	0
	<3> X2	Ending X position	0
	<4> Y2	Ending Y position	0
Parm2 - Repeat	<1> Repeat on all pages	0=Current page only 1=Print on all pages	

Remarks

The rectangle will be printed on every page if the Repeat parameter is set.

Example

```
/* The following example shows how to use the RECT message to print a rectangle on every page. */

declare function Set_Printer
stat = Set_Printer("INIT") /* Start printing
stat = Set_Printer("RECT",1:@fm:1:@fm:2:@fm:3, 1) /* Print RECT
stat = Set_Printer("TERM") /* End printing
```
