

Set Printer START32

Description

The **START32** message must be called once to enable the 32-bit features of the OIPI. This message must be called before the [INIT](#) message.

You should only call this message once. You should call this message during the [CREATE event](#) of the main form, and call the [STOP32](#) message during the [CLOSE event](#) of the main form.

Remarks

Note: *This Message is DEPRECATED as of OpenInsight 7.0.*
