

# Set Printer STOP32

## Description

The **STOP32** message is used to end the 32-bit printing engine. All reports printed after the STOP32 message will use the Standard OIPI.

**Note:** Send the STOP32 message once, preferably from the [CLOSE event](#) of the window, when the application exits.

## Remarks

**Note:** This Message is DEPRECATED as of OpenInsight 7.0.
