

# U2 Functions in OI U2 Subcall

## Description

A routine for running subroutines on the U2 back end. Results of the subroutine are returned/sent to the OI client.

## Syntax

U2\_SUBCALL(sVolumeld,SubName,ParamCount,P1,P2,P3,P4, ...P30)

## Parameters

The function has the following parameters:

| Parameters | Description                                                |
|------------|------------------------------------------------------------|
| sVolumeld  | U2 volume name or handle                                   |
| SubName    | Name of subroutine to Execute                              |
| ParamCount | Number of parameters expected by the subroutine ( 1 - 10 ) |
| P1 ... P30 | IN/OUT P1 ... P10 ( Optional) parameter values, default to |

## Returns

Any data returned is dependent upon the subroutine invoked.
