

Properties

OLE control properties are the primary means of interacting with OLE controls. Properties, much like OI control properties, describe the persistent attributes of the control, that is, attributes having some meaningful value for the entire life of the control. Like OI control properties, OLE control properties are manipulated using the `Get_Property` and `Set_Property` routines. The following properties apply to the SRP Button Control:

Property	Description	Version Introduced
BackVisible	Determines whether or not the button's background is drawn.	
Background	The button's background.	
ButtonType	Determines whether the OLE Button will behave as a standard push button or as a checkbox (aka toggle button). By default the control will act as a standard push button. When used as a checkbox you can specify whether it will have two or three states.	
Cancel	Allows the OLE Button to become the Cancel Push Button for the current form so it will automatically respond whenever the end user presses the ESC key.	
Caption	Determines the text caption that appears on the face of the OLE Button.	
CaptionList	The list of captions to appear on the button's surface.	
ContextMenu	The button's custom context menu.	
Default	Allows the OLE Button to become the Default Push Button for the current form so it will automatically respond whenever the end user presses the Enter key.	
Font	Sets the font attributes for the Caption text of the OLE Button.	
Forecolor	The button's text color.	
Handle	The button's window handle.	
Icon	The image displayed on the button's face.	
IconEffects	Conditions to determine which special effect to apply to the buttons' icon.	3.0.7
IconList	The list of icons to appear on the button's surface.	
IconSize	The fixed size of the button's <i>icon</i> .	4.0.1
IconSizeToFit	The image displayed on the button's face.	
ProgID	The control's ProgId/Class Name.	
State	The button's state.	
StatusBarText	The text to be displayed in a status bar.	
Style	The button's visual style.	
ToolTip	The text to appear in the button's tool tip popup.	
TransparentColor	The color not to be drawn in the button's image.	
Version	The control's version info.
