IsUTF8 Function

Description

Returns whether or not the string data is interpreted as UTF-8 or ANSI characters.

Syntax

bUTF8 = **IsUTF8()**

Note

This is the programmatic equivalent as reading the status of the UTF8 Character Mode checkbox in the System Editor, Form Designer, or Application Properties.

See Also

SetUTF8 subroutine

Example

```
declare function IsUTF8
if IsUTF8()= 1 then
   call msg(@window, "Characters are interpreted as UTF-8.")
end else
   call msg(@window, "Characters are interpreted as ANSI..")
end
```
