

SRP_Get_FileVersion

Gets the file version of a given file.

 Added in 2.1.10

Syntax

```
Result = SRP_Get_FileVersion(FilePath)
```

Returns

The four-part file version number, e.g, 2.1.10.4.

Parameters

Parameter	Description
FilePath	The path to the file whose file version to get

Remarks

The SRP_Get_FileVersion method returns the file version for a given file. Specifically, this method gets the FILEVERSION property of window's file. You can pass a full path or a relative one.

Example

```
// Get the file version number for OI  
Version = SRP_Get_FileVersion("oinsight.exe")
```
