

SetValues

Sets a group of values into the property panel, based on the property keys and values provided in a list format.

Usage

```
SRP_PropertyPanel(PanelsCtrl, "SetValues", Values)
```

Parameters

Values

Pos	Name	Description
<x, 1>	PropertyKey	One of the properties currently in the panel; referenced by its key name.
<x, 2>	Value	The value to assign to the above property (conversion settings apply).
