Office2013	Office 2013 visual style
VisualStudio2012Light	Visual Studio 2012 light visual style
VisualStudio2012Dark	Visual Studio 2012 darkvisual style

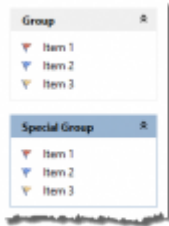

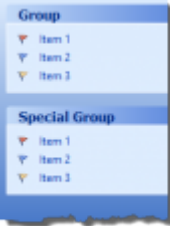

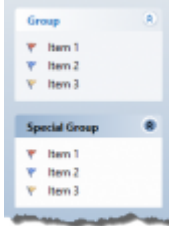

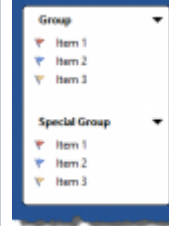

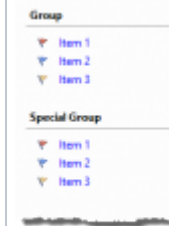

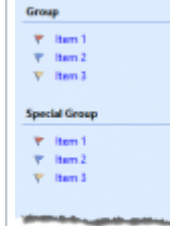

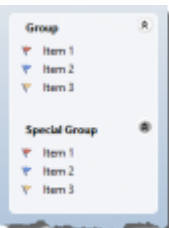

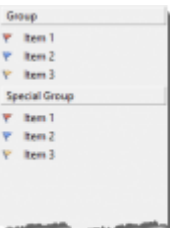

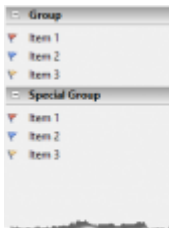

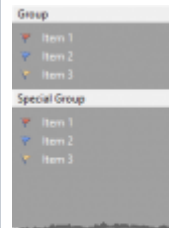

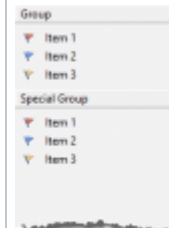

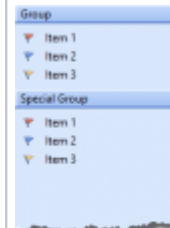

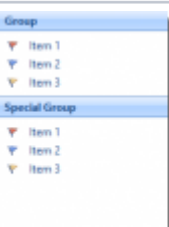

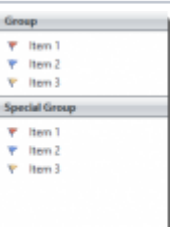

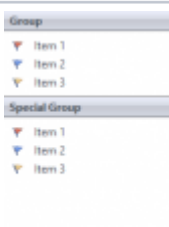

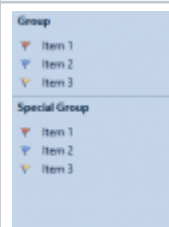

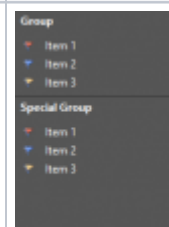

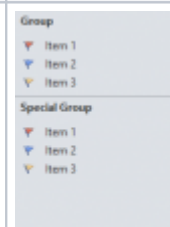

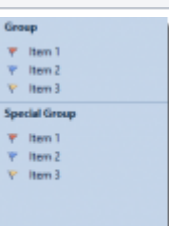

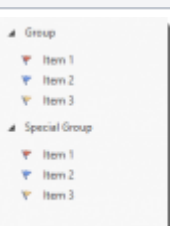

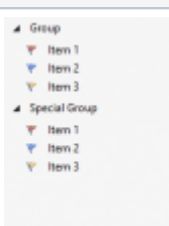

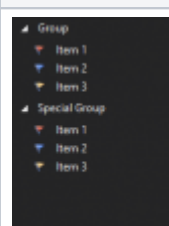

Default: WinXP

Remarks

The Theme property establishes the visual presentation of the shortcut bar, and there are 12 styles to choose from. Furthermore, themes have their own hot track styles and margin settings, which will be used if you have the [HotTrackStyle](#) or [Margins](#) property set to "Default". However, you can modify the hot track style or margins of any theme to suit your needs.

Some themes render special groups differently for emphasis. See the [GroupSpecial](#) property for more details.

Here are screenshots of the available themes. Note that these screenshots were taken in Windows 8.1, and some themes adjust to the systems colors and may therefore be different on your system.

Office2000	Office2003	WinXP	Office2000Plain	OfficeXPPlain	Office2003Plain
					
WinXPPlain	Toolbox	ToolboxWhidbey	ListView	ListViewOfficeXP	ListViewOffice2003
					
Office2007Blue	Office2007Black	Office2007Silver	Office2010Blue	Office2010Black	Office2010Silver
					
Windows7	Office2013	VisualStudio2012Light	VisualStudio2012Dark		
					

Example

```
// Set an Office theme
Set_Property(@Window:".OLE_SHORTCUT", "OLE.Theme", "Office2003")

// Set a plain theme
Set_Property(@Window:".OLE_SHORTCUT", "OLE.Theme", "OfficeXPPlain")

// Set a toolbox theme
Set_Property(@Window:".OLE_SHORTCUT", "OLE.Theme", "ToolboxWhidbey")

// Set a list view theme
Set_Property(@Window:".OLE_SHORTCUT", "OLE.Theme", "ListViewOffice2003")
```
