Methods

OLE control events provide a way for the OLE control to communicate back to OpenInsight. Once an event has been qualified using OI's QUALIFY_EVENT message, then the OLE control will fire the event to OpenInsight allowing you to respond to any one of the control's predefined actions. Some events allow you to stop certain actions before they occur, so be sure to read the Remarks section of each event carefully. The following events apply to the SRP Picture Control:

Method	Description	Version Introduced
AboutBox	Displays the control's about box.	
Clear	Removes the currently loaded image.	4.0.0
DoClick	Fires the OnClick event.	
DoDblClick	Fires the OnDblClick event.	
GetMetaData	Gets all metadata stored in the image for a specific model.	
GetMetaDataModels	Gets a list of all metadata models stored in the image.	
GetMetaDataTag	Gets a single metadata tag stored in the image.	
GoToNextFrame	Advances to the next image frame.	
LoadRawImage	Loads an image from an array of bytes.	
Refresh	Redraws the control.	
ShowContextMenu	Displays a context menu at the given mouse point.
