

Methods

Methods

OLE control methods provide convenient one-time operations to developers. Unlike properties, whose values are persistent over the life of a control, methods represent actions that a control can perform. Often, methods will change the values of other control properties, so be sure to read the Remarks section of each method carefully. The following methods apply to the SRP Calendar Control:

Method	Description	Version Introduced
AboutBox	Displays the control's about box.	4.0.3
AddAppts	Adds new appointments to the control.	4.0.3
AddCalendars	Adds new calendars to the control.	4.0.3
AddLabels	Adds new labels to the control.	4.0.3
EnsureVisible	Brings a given appointment into view.	4.0.3
SelectAppt	Brings a given appointment into view and selects it.	4.0.3
