SRP_Path Expand

Expands a relative path into an absolute path.

Syntax

```
NewPath = SRP_Path("Expand", Path)
```

Parameters

Parameter	Description
Path	A path without command line parameters.

Returns

The newly expanded path.

Remarks

The Expand service converts any relative path, or path with relative components somewhere inside of it, into an absolute path.

Example

```
Result = SRP_Path("Expand", "C:\Revsoft\.\OInsight\..\OInsight\.\BMPS")
```

Result will contain "C:\Revsoft\Oinsight\BMPS".
