SRP_Path IsUNC

Determines if the string is a UNC path.

Syntax

```
IsUNC = SRP_Path("IsUNC", Path)
```

Parameters

Parameter	Description
Path	A path without command line parameters.

Returns

1 If the path is UNC formatted, 0 otherwise.

Remarks

The IsUNC service determines if the path uses UNC formatting. The determination is made using only the formatting. It does not matter if the path points to a real folder.

Example

```
Result1 = SRP_Path("IsUNC", "C:\Windows")
Result2 = SRP_Path("IsUNC", "\\server\dir")
```

Result1 will be 0. Result2 will be 1.
