

SRP_Path PathToUrl

Converts a Windows path into a file URL.

Syntax

```
URL = SRP_Path("PathToUrl", Path)
```

Parameters

Parameter	Description
Path	A path without command line parameters.

Returns

The path reformatted into a URL

Remarks

The PathToUrl service prefixes the given path with "file://" if it isn't there already.

Example

```
Result = SRP_Path("PathToUrl", "C:\path\filename.txt")
```

Result will be "file://C:\path\filename.txt"
