

SRP_Path UriToPath

Converts a file URL into a Windows path.

Syntax

```
Path = SRP_Path("UriToPath", URL)
```

Parameters

Parameter	Description
URL	A URL beginning with "file://"

Returns

The URL reformatted into a path.

Remarks

The UriToPath service removes the file://" prefix if it exists.

Example

```
Result = SRP_Path("UriToPath", "file://C:\path\filename.txt")
```

Result will be "C:\path\filename.txt"
