

SRP_HTTP_FRAMEWORK_HTTP_STATUS_CODES

This configuration record is a repository of the standard [HTTP status codes](#) and their descriptive phrases. While these status codes are generally sufficient for most HTTP responses, developers may wish to extend this list or modify the phrases of standard HTTP status codes.

The [GetResponseStatus](#) service from the [HTTP_Services](#) module will pull the HTTP status phrase from this record. Here is the format of [SRP_HTTP_FRAMEWORK_HTTP_STATUS_CODES](#):

Attribute	Name	Description
<1>	HTTP Status Codes	An @VM delimited list of HTTP status codes.
<2>	HTTP Status Phrases	An @VM delimited list of HTTP status phrases.
