

SetResponseStatus

Sets the HTTP status code to be used in the response.

Syntax

```
Response = HTTP_Services('SetResponseStatus', Code, Phrase)
```

Returns

N/A

Parameters

Parameter	Description
Code	HTTP status code to set. Required.
Phrase	Custom phrase to send with the status code. Optional.

Remarks

This can be set at any time. If unchanged by other routines this will be the status code used. A standard list of HTTP status codes can be found [here](#).
