

GetAPIRootURL

Returns the API Root URL for the web site.

Syntax

```
Response = HTTP_Services('GetAPIRootURL', FullURL)
```

Returns

The end point or full URL that defines where the API entry point begins.

Parameters

Parameter	Description
FullURL	Boolean flag indicating if the full URL or just the end point should be returned. Default is <i>True</i> . Optional.

Remarks

It pulls this from [SRP_HTTP_FRAMEWORK_SETUP](#) <2>. A full URL will contains the [Home URL](#) appended with the end point API URL.
