

GetCapturePath

Returns the capture path for the request and response content.

Syntax

```
Response = HTTP_Services('GetCapturePath')
```

Returns

The OS path on the web server where copies of the requests and responses will be stored in text files.

Parameters

N/A

Remarks

It pulls this from [SRP_HTTP_FRAMEWORK_SETUP](#) <3>. If the path exists, then the [HTTP_MCP](#) *controller* will create files with the following name formats:

```
Request_@_yyyy-mm-dd_hh-mm-ss.txt  
Response_@_yyyy-mm-dd_hh-mm-ss.txt
```
