

GetFlushCacheFlag

Returns the enable authentication flag setting.

Syntax

```
Response = HTTP_Services( 'GetFlushCacheFlag' )
```

Returns

Returns the flush cache flag setting. This is used by the [ClearSettings](#) service to determine if a Flush and GarbageCollect statement should be called in order for changes in web service procedures to always be available without having to restart the OEngineServer.

Parameters

N/A

Remarks

It pulls this from [SRP_HTTP_FRAMEWORK_SETUP](#) <7>.
