

Base Install Instructions

SRP Frameworks 16.04.01

OI10-specific instructions are included where applicable. Last updated 06 Sept 2022

01) Install SRP Utilities (required)

- SRP Team Folder, SRP Utilities. For OI10, use the SRP_Uilities_RDK_64 version.
- Manually copy over SRPUtilites.dll to verify it has been updated.

02) Install SRP Editor (optional)

- SRP Team Folder, SRP Editor. For OI10, use the SRP_EDITOR_BUNDLE_RDK64 version.
- To add the editor to the OI10 menu, first run the editor from the command line via "EXEC SRP_EDITOR". Then, from the Tools, Options window, click the button to add to the IDE menu.

03) Create a FRAMEWORKS application

04) Copy the AppData folder to the Revboot folder (optional, for clean install)

- If applicable, attach the new tables located in the AppData folders under Revboot, and update the database.
- OI9: Database Manager. OI10: View, Tool Panels, Database

05) Copy the Frameworks folder (images) to \BMPS\Frameworks

06) Install the Frameworks Base Install RDK

07) Define the entry point : **FW_MAIN**

- OI10: Settings, Application Settings, Entry Point Window

08) Verify that all necessary and correct controls are registered: SRPEditor, SRPcontrols.ocx, SRPutil.ocx, SRPlcense.dll, etc.

- SRP Team Folder, SRP ActiveX Controls
- SRP Team Folder, SRP ActiveX Controls, SRPutil

09) Restart OI

10) Log into Frameworks as admin/admin
