

# GetNonAuthenticatedPaths

Returns the list of non-authenticated URLs.

## Syntax

```
Response = HTTP_Services('GetNonAuthenticatedPaths')
```

## Returns

Returns the list of non-authenticated URLs. This is used by the [URLRequiresAuthentication](#) service to determine if a specified URL requires authentication.

## Parameters

N/A

## Remarks

It pulls this from [SRP\\_HTTP\\_FRAMEWORK\\_SETUP](#) <8>.
