

EnableCommands

Enables all controls bound to the given list of commands.

Syntax

```
Send_Message(Ctrl, "OLE.EnableCommands", CommandList)
```

Parameters

Parameter	Description
CommandList	@FM delimited list of command keys

Remarks

The EnabledCommands method conveniently batch enables a collection of commands. Simply pass an @FM delimited list of command keys, and all controls associated to all the commands will immediately enable. See also the [DisableCommands](#) and [HideCommands](#) methods.

Example

```
// Enable several commands at once
Send_Message(@Window:".OLE_RIBBON", "OLE.EnableCommands", "NEW":@FM:"OPEN":@FM:"SAVE":@FM:"CLOSE")
```
