Removing Promoted Events

Follow these steps to remove the promoted event we just created.

1. From the Application Manager Double Click on **Miscellaneous**, then **Application Rows**.   Click on the appropriate entity:

```
SYSREPOSEVENTEXES:EXAMPLES_GOTFOCUS..OIWIN_
```

2. From the menu select **Entity**, then **Delete**.

3. Open the System Editor and type the following in the **EXEC** line

```
RUN DELETE_ROW SYSREPOSEVENTEXES, EXAMPLES*GOTFOCUS..OIWIN*
```

This will delete the Promoted Event Shell BASIC+ object code from the SYSREPOSEVENTEXES table.

4. Run the **EVENTDESIGNER** form, select the **GOTFOCUS** event for the Window and change **Enforce** to **No**. Click **Save** to close the window.

5. Log out and log back in to make OpenInsight to recognize the change.

6. Recompile all your forms to reflect the change
