

Properties

OLE control properties are the primary means of interacting with OLE controls. Properties, much like OI control properties, describe the persistent attributes of the control, that is, attributes having some meaningful value for the entire life of the control. Like OI control properties, OLE control properties are manipulated using the Get_Property and Set_Property routines. The following properties apply to the SRP Panel Control:

Property	Description	Version Introduced
ActiveForm	The currently visible embedded form.	4.0.2
Background	The panel's background color fill.	
Border	The control's border style.	
BorderColors	Customizes the colors of an SRP ActiveX Control's border.	3.1.0
Cancel	Cancels the parent form closing	4.0.0
Height	The height of the panel's scrollable pane.	
Left	The position of the horizontal scrollbar.	
ProgID	The control's ProgId/Class Name.	
Top	The position of the vertical scrollbar.	
Version	The control's version info.	
Width	The width of the panel's scrollable pane.
