

CloseButtonColors

The colors used to render the close buttons at various states.

Usage

```
Set_Property(CtrlEntID, "OLE.CloseButtonColors", Array)
```

Values

Array has the following structure:

Pos	Name	Type	Description	Default
<1>	Normal Colors			
<1, 1>	Normal Foreground	Color	The close button's foreground color in its normal state	"RGB(128, 128, 128)"
<1, 2>	Normal Background	Color Fill	The tab's background in its normal state	"None"
<2>	Hot Colors			
<2, 1>	Hot Foreground	Color	The close button's foreground color when it's hot	"White"
<2, 2>	Hot Background	Color Fill	The tab's background when hot	"Vertical(Gradient(Red, Red), Border(Red L-=10), Rounded(2))"
<3>	Pressed Colors			
<3, 1>	Pressed Foreground	Color	The close button's foreground color when it's pressed	"White"
<3, 2>	Pressed Background	Color Fill	The tab's background when selected	"Vertical(Gradient(Red L-=10, Red L-=10), Border(Red L-=10), Rounded(2))"
<4>	Disabled Colors			
<4, 1>	Disabled Foreground	Color	The close button's foreground color when it's disabled	"RGB(196, 196, 196)"
<4, 2>	Disabled Background	Color Fill	The tab's background when disabled	"None"

Indices

Index	Description
index	Index to an existing tab.

Remarks

The CloseButtonColors property allows you to customize the colors of all close buttons. By default, the colors are set to be somewhat subtle until hovered over, at which point it becomes red like most Windows' close buttons. You can alter each state as you wish, just note that it will affect all close buttons.
