

SetOECGIProcErr

Sets the HTTP ProcErr that the OECGI creates to memory so it can be retrieved by later routines. This avoids the need to pass this around into various routines.

Syntax

```
Response = HTTP_Services('SetOECGIProcErr', ProcErr)
```

Returns

N/A

Parameters

Parameter	Description
ProcErr	The text of the procedural error. Required.

Remarks

This is used by the designated ProcErr handler (see [GetAbortedService](#)). There is no reason to use this service elsewhere.
