

GetOECGIProcErr

Returns the original HTTP ProcErr that the OECGI creates.

Syntax

```
Response = HTTP_Services('GetOECGIProcErr')
```

Returns

The original HTTP ProcErr that the OECGI creates.

Parameters

N/A

Remarks

Used by the [CreateLogFile](#) service when creating the ProcErr log. It will also be used when creating the Request log and the *Request* argument is empty.
