SelApps

The currently selected appointments.

Usage

```
SelectedAppts = Get_Property(CtrlEntID, "OLE.SelAppts")
```

Values

Semi-colon delimited list of appointment keys.

Remarks

The SelAppts property is the list of currently selected appointments. Setting this property programmatically selects appointments. At any time, you can read this property to determine what is selected. If nothing is selected, this property is "".

This property is Read Only. Use SelectAppt to select an appointment.

Example

```
// Get the selected appointments
SelectedAppts = Get_Property(@Window:".OLE_CALENDAR", "OLE.SelAppts")
```
