

ApptList

All the appointments in the control.

Usage

```
Set_Property(CtrlEntID, "OLE.ApptList", Appts)
```

Values

@FM delimited list of appointments.

Default: ""

Remarks

The ApptList property defines all the appointments for the control. This property is an @FM delimited array, with each field containing these values:

Position	Name	Type	Description
<x, 1>	Calendar Key	Text	The unique key of the calendar to contain this appointment.
<x, 2>	Key	Text	The unique key for this appointment. No two appointments can have the same key, even if they are in different calendars.
<x, 3>	Start	DateTime	The date and time, in OI internal format, that the appointment begins.
<x, 4>	End	DateTime	The date and time, in OI internal format, that the appointment ends.
<x, 5>	Subject	Text	The short summary describing the appointment.
<x, 6>	Body	Text	The details of the appointment.
<x, 7>	Location	Text	The brief description of the appointment's location.
<x, 8>	Label Key	Text	The unique key of a previously defined label, which will categorize and colorize this appointment.
<x, 9>	Busy Status	Option	One of four options: "Free", "Tentative", "Busy", or "OutOfOffice".
<x, 10>	Importance	Option	One of three options: "Low", "Normal", or "High".
<x, 11>	Is Meeting Flag	Boolean	Determines if the appointment is a meeting.
<x, 12>	Is Private Flag	Boolean	Determines if the appointment is private.
