

# OnViewChange

Fires when the user changes the current view.

## Parameters

Parameter	Description
View	The name of the current view.

## Remarks

The OnViewChange even fires when the user changes the view via the caption bar. The following are the possible values of the View parameter:

Value	Description
Day	The single day view
FullWeek	The full week side-by-side view with each day as a column.
Month	The full month view.
TimeLine	The time line view
Week	The full week view with each day as a box.
WorkWeek	The Mon-Fri side-by-side view with each day as a column.
