

# DefCloseButton

Default close button setting for new items.

## Usage

```
Set_Property(OLECtrlEntID, "OLE.DefCloseButton", Value)
```

## Values

*Value* must be true or false.

**Default:** false

## Remarks

The DefCloseButton property establishes the default close button setting for new items. Setting this property will not change existing items. Instead, newly added items will take on the setting established in this property. See the [ItemCloseButton](#) property for details.

***The [CloseButtonConditions](#) property is a much easier way of setting check boxes.***

For more information on how default properties can make you more efficient, see the [Default Properties](#) article.

## Example

```
// Make close buttons the default for future items
Set_Property(@Window:".OLE_TREE", "OLE.DefCloseButton", 1)
```
